

# REVISION WORKOUT 1

Revision is just like any other form of activity – you need to practise retrieving knowledge and applying it to questions – set yourself a time for doing certain activities and do a variety of tasks that challenge you.

Warm Up

- List 5 research methods that produce quantitative data
- List 5 research methods that produce qualitative data
- Identify one advantage and one disadvantage of using each of these types of data

First Activity

Find one piece of research for each of the methods identified in your warm-up

Second Activity

Write a response to the question – outline and explain 2 limitations of using covert observations (10)

Cool Down

Mind-map the different Practical, Ethical and Theoretical considerations researchers need to think about
